

# Squirrels

By: Isha, LJ, and Jimmy

Many types of squirrels live in cities, backyards, and even forests. They use their tails to balance.

Squirrels are always moving.

Squirrels start exercising at 6 AM.

Squirrels can run 15 mph, they are active at dawn and dusk.

Some squirrels can fly.

Squirrels sleep with their tails up around them.

Squirrels play in the snow.

Squirrels cuddle. They live in trees. They climb. Squirrels eat meat.

Squirrels can have 2-8 kits.

Info Meeting!

Animal Rights Club

Come learn how YOU can be involved with Animal Rights Club! Everyone welcome!

A red squirrel is perched on a tree trunk, facing left. The background is a soft, out-of-focus yellow and orange, suggesting a sunset or sunrise.

Squirrels can live anywhere

Squirrels find their food and save it for winter.
